My favorite wine from the sunny island.

In 1913, the island had 140 hectares of viticulture, in 1928/29 almost all vines froze to death and the weinbau had to give way to the high-yielding vegetable cultivation. In 1970, the slope areas were again designated for vines by land consolidation. Today, the vineyard again covers about 22 hectares, and the trend is rising. Nevertheless, the winegrower's wine is the smallest independent wine cooperative in Baden

But – it also takes a little longer, especially if other guests have already ordered.

We strive to complete as soon as possible.

Thank you for your understanding!

I try to buy all the products we offer in very good quality and regionally, preferably from organic farming. We do not use finished products.

We produce our salad dressings, gravy and meat broths without flavor enhancers, flavors and dyes. Despite the artisanal nature of our food, it is not excluded that traces of allergy-inducing foods are contained in our food. These include: gluten-containing cereals, eggs, fish, peanuts and other types of nuts, celery, mustard, sesame, sweet lupine and sulphur dioxides/sulphites. A list for allergy sufferers can be viewed at the counter, all products we use are documented there.
